

Create Searchable PDF Option

Convert directories of image files to PDF files with embedded text

Quick Tips

Save Documents to a New Folder Instead of Saving to the Folder Containing the Originals

Breeze will name the output files the same as the original file, so make sure there are no duplicate name

Breeze will save the OCR text within the PDF file, if you need the OCR saved as a separate file, then use a different Breeze option

If you need to move or burn these images to a CD/DVD, copy the output folder (and all of the contents) to the destination or root of the disc
