

DII From Folder

Create a DII file by selecting any folder structure containing image files.

6
breeze

Quick Tips

1. Breeze will create a new record for each image file in the directory structure you have chosen. Make sure you prefer each image file should each equal one record in your database.
2. No image conversion is processed using this option.
3. The new DII file is saved in the folder you selected in Step 1.
